

TITLE: “ HOSTELS AS A VIABLE DELIVERY POINT FOR GOODS AND FOOD PRODUCTS”

Introduction:

This report aims to provide an overview of the availability of delivery service to each hostel within the college.

Assessing the accessibility of delivery services becomes crucial for enhancing the students satisfaction.

Methodology:

Hostel Mapping: The college campus was divided into distinct hostel zones, each housing a specific number of students.

Survey and Data Collection: A survey was conducted among 20 students to gather information on the availability of delivery services to their respective hostels. Key data points included:

- List of hostels.
- Types of delivery services accessible.
- Delivery hours.
- Quantity of service.

Analysis: Data collected from the survey were analyzed to determine the availability and accessibility of delivery services across different hostels. Factors such as geographical location, student population, and service coverage were considered.

Findings:

- According to the data shown by e commerce website delivery taking place during peak sun hours leading to skin cancer, nose bleeding and many more diseases which are harmful to health.

Hostel-wise Availability:

Hostel 1.8k: Delivery services available from multiple vendors with extended delivery hours.

Hostel Sarojini : Limited options available, mainly during peak hours.

Hostel Blocks : No direct delivery service, but students can opt for nearby pickup points.

Service Quality:

Overall service quality varied among hostels, with some experiencing delays during peak hours.

Hostels closer to Main Gate tended to have better service coverage and faster delivery times.

Conclusion:

The availability of delivery services to hostels within the college campus plays a significant role in meeting students' dining needs and enhancing their overall college experience. By analyzing and addressing the findings of this report, the college administration can work towards ensuring convenient and diverse food and product delivery options accessible to all students, contributing to their satisfaction and well-being. And for the night time the administration should keep a night canteen for students. Regular monitoring and collaboration with delivery partners are essential to maintaining the quality and reliability of these services over time.
