

VITAL SIGNS

By Robin cooks

Name: Jalani Goutham
Roll No: 24MMB0A28

Title and Author:

Vital Signs by Robin cook

Introduction:

I Picked this book because I like reading thriller and suspense stories. The title and cover looked really interesting ,and when I got to know that the book is about a woman shaking the whole medical system and I was keen to study the whole story and It turned out to be a mix of whole emotions.

Summary:

Vital Signs is book is about Dr.Marissa Blumenthal .She is a renowned pathologist.She had everything in life -a good husband,success and money,but the only thing that bother her is she was not able to become a mother. The reason for this is because she has blocked fallopian tubes .Although she did not lose hope of becoming a mother, Marissa and her husband tried Invitro fertility by visiting a famous fertility centre. Already they tried this method for two times but it failed in forming ovum when implanted in Marissa.

She started to suspect the clinic for this failure .When she met other patients in the clinic she found out that there very many women like her .She started to investigate on her denying her husband warning her not to do so.

Marissa wanted to be a mother so much that she was ready to take any risk. You can feel how bad she wants it.She starts to find very strange incidents happening in the clinc like patients files gone missing .

Analysis & Opinion:

The thing which I liked the most is Dr.Marissa herself. She not someone who leaves everything on god ,Even after falling twice and her husband denying her to stop it .She argues with him and says,"I don't care what it takes -I have to know the truth" .This shows how serious she is.

The story was interesting. Every chapter feels like climax of a movie with suspense left in readers.

It was very shocking to know that book was written based on real life incidents. It brokes the trust of people on hospitals and Doctors. It also shows how greed

for more money influenced clinics and hospitals. Doctors who are meant to be the saviours of life are now risking patients life for money.

Personal Connection:

This book made me feel more aware, that no one can be trusted .I think there should be clear transparency for people too, like they should know why and where the treatment went wrong by clearly showing their reports.

Sometimes life is hard,we have to bite the bullet and move forward. Marissa did not throwed the towel, even when her own husband didn't supported her. She made herself rock hearted and kept looking for answers ,I personally liked her attitude.

That kind of attitude of Marissa was shown from beginning to end of the book, she never stepped back or changed her attitude.

Conclusion:

I would recommend this to book to any one who enjoys mystery, thriller and have never step back attitude. It is not only about medicine ,it is about standing strong when there is nobody to support you .It would be very intresting for people who really enjoy real-life thrillers.
