The central theme includes secrets , importance of paying attention to small clues , facing of dangerous consequences and hidden true intentions of People.

**Analysis and opinion:**

It is one of the best books , I have ever read .It is mix of mystery with humour and adventure . Every part of the story is sensible and imaginable. By this book my interest over solving and imagining the things has been increased. The twist at the end was unexpected and made whole story in a clever way.

Bundle Brent is not a typical detective but she is determined and smart. I liked how she followed her thoughts and didn't give up, even when things got dangerous. There is a part in the book where she says, “I'm not going to sit around while

everyone else solves the mystery,” which shows her strong determination and independent nature. At one point, Jimmy mentions that Bundle had already figured out more than the police, which shows how sharp she is.

I did not like some parts of the story where the character plenty come into play without introduction .

### **Personal connection:**

The book made realize that unexpected people can be brave and smart. Bundle personality has inspired me ,the way she follow her thoughts and didn't let her fall down. She reminds curious is not a bad thing sometimes it leads to finding truth.

This book encouraged me to dig into things more and not just accept the reality. I found myself trying to put two and two together, just like Bundle did, and it felt great when small clues added up.I also learned that it's okay to speak up when something feels off. This mystery really hit home, especially the part about trusting your thoughts .

### **Conclusion:**

Yes, I would recommend this book to people who are interest in thrilling story and with mix of mystery and humour. Ever chapters introduces a suspicious character and jaw dropping twist in the every chapter . The book over all fun ,thrilling and exciting.
