

BOOK REVIEW

★ **NAME:** MADDI LAXMI SAADHAN.

★ **ROLL NO:** 24MMB0A39.

➡ **TITLE OF BOOK :** THE SIX BAD BOYS.

➡ **AUTHOR OF BOOK:** GWID BLYTON.

➡ **INTRODUCTION:**

I chose this book because the title looked interesting and I like reading stories about real life. I also heard that Gwid Blyton writes good books for children and teenagers. When I saw the title *The Six Bad Boys*, I thought maybe it is about boys who get into trouble. I wanted to know why they became bad. I expected the book to be fun, but also serious and maybe teach something important about life and choices

➡ **SUMMARY:**

This book is about two different groups of boys. One group is nice and good, and the other group starts doing bad things like stealing, skipping school, and lying. These six boys join a gang and do many wrong things. They think it is fun at first, but later they face problems.

The main characters are boys like Bob, Tom, and Wily, who is the gang leader. There is also Mr. Jennings, a kind man who tries to help the boys. The book shows how some boys feel lonely or angry at home, and this makes them choose the wrong path.

The story talks about friendship, peer pressure, and second chances. It shows how children can change if someone helps them. The book does not just blame the boys—it shows their side too. It makes the reader think about what is right and wrong. The story is not boring and makes you want to keep reading to see what happens in the end.

ANALYSIS & OPINION:

I liked this book because it is very real and not like all the common story books. This book shows that sometimes often children do bad things, but not because they are evil, but because they feel alone or no one cares for them. I think this is a very good message for everyone.

The character I found most interesting was Wily. He was the gang leader and always told the others what to do. He was smart, but he used his brain in the wrong way. I feel if someone had helped him earlier, maybe he would have been different.

One line I remember from the book is when one of the boys said, “I want to change. I don’t want to go back to my old ways.” That showed he really wanted to be better. In another part, Mr. Jennings told the boy that he believed he could become a good person again. That made me feel happy.

One thing I didn’t like was that the story ended too fast. I wanted to know more about what happened after the gang broke up. But still, the message of the book was very strong.

This book teaches us not to give up on others and to try to understand why someone is acting bad. Maybe they just need help. It also shows how important love, care, and good friends are in life.

PERSONAL CONNECTION:

This book really made me think. I used to think that bad kids are just bad for no reason. But now I understand that maybe they feel hurt inside. This book helped me see things in a new way.

I remembered a boy in my old school who always got into trouble. After reading this book, I feel maybe he just wanted attention or needed a friend. Now I will try to *look out for* others and not *give up on* them so fast.

This story taught me that “don’t judge a book by its cover” is true. Just because someone is acting wrong, doesn’t mean they are a bad person. Also, the idiom “a leopard can’t change its spots” is wrong in this case. In the story, some boys did change and became better people.

This book made me feel more kind and careful with how I treat people. It also showed me that a small act of kindness can change someone’s life. I really learned something from it

CONCLUSION:

Yes, I would tell others to read this book. It is not just a story—it teaches a lesson. It is easy to read and makes you feel something. I think students, teachers, and parents will all like it. Anyone who wants to read about real life and change will enjoy this book. It is simple but strong. I liked it a lot.

THANK

YOU
